

LOGIC
TW7
TRUE WIRELESS HEADSET

QUICK GUIDE | GUÍA RÁPIDA

THANK YOU FOR
YOUR PURCHASE!

IMPORTANT NOTE:

Thank you for choosing our product!
We are committed to delivering the
best sound quality and comfort
experience.

BEFORE YOU BEGIN, PLEASE FOLLOW THESE RECOMMENDATIONS:

- Place the earbuds inside the case
and fully charge them for 1.5 hours
before first use.
- Read this quick guide to maximize
their performance and features.

Product Specification >>

Product name: TW7
Bluetooth version: 5.3
Battery input: DC 5V
Earphone Battery: 30mAh
Charge Case Battery: 150mAh
Working time: About 2-3hours
Sensitive: 96+/-3
Frequency: 20Hz-20KHz
Impedance: 32Ω
Profile Support: HFP/HSP/A2DP/AVRCP

Operation Instructions >>

Binaural Function:

- L R**: Click 1 time | Play/Pause | Receive a Call/End the Call
- L R**: Press & hold for 2 seconds | Call Rejection
- L R**: Long press 2 seconds | Power ON
- L R**: Long press 3 seconds | Power OFF
- L**: Click 3 times | Last number redial
- R**: Click 3 times | wake up voice assistant
- L**: Long press 2 seconds | Previous song
- R**: Long press 2 seconds | Next song
- L**: Click 2 times | Vol+
- R**: Click 2 times | Vol-

Product Schematic >>

Charging Case

When charging: Flash white light
Full power: Solid bright white light
When charging the earbuds: Solid bright
white light
Charging time: about 90 minutes
Earbuds
When charging: Solid bright red light
Full power: Light OFF
Charging time: about 60 minutes
Warning

When you are plugging your cable in to a
wall charger, we recommend using a
UL/ETL 5V/1A approved charger. Don't use
the fast charger over 5V/1A to avoid
damage to the charging case. To ensure
the battery life of the earbuds, the earbuds
and charging case should be charged once
a month.

Product operation >>

Using Both Earbuds / Binaural Use:

1. Remove the earbuds from the charging
case, the earbuds will automatically turn on
and pair;
2. Turn on the Bluetooth of your mobile
phone and put the earbuds close to the
mobile phone. Select "Logic TW7" from the
Bluetooth device list to connect.

Power OFF:

1. Put the earbuds in to the charging case,
the earbuds will turn off automatically. The
charging case will automatically charges the
earbuds;
2. When the earbuds is turned ON, long
touch for 3 seconds to turn it OFF;
3. If the earbuds is not conneted for 5
minutes, it will power OFF automatically.

Charge:

Prepare the USB charger and connect the
charging cable to the charger and connect
the white light flash after full charging, solid
bright white light.

FAQ

A. When the earbuds can't turned on
automatically Check if the earbuds has
power (after the charging case is
connected with USB, and the earbuds is put
in to the charging case for charging
continuously for more than 1 hour).

B. When the earbuds have only one side
sound or the mobile phone can not find
the Bluetooth device.

1. Make sure that both earbuds are powered
on and can be turned on normally;
2. Check if one earbud can connect to the
other Bluetooth device;
3. Clear all the corresponding Bluetooth
device name on the mobil phone, put both
earbuds in to the charging case, find an
open area, reconnect the two earbuds.

C. When the earbuds is stuck or
disconnected while talking or playing music

1. The earbuds is low on power;
2. Check if the device is within a reasonable
distance, preferably within 10 meters;
3. Check if there is a large are of signal
barrier between mobile phone and
earbuds, such as wall or iron door;
4. There are interfering devices attached,
such as routers or Bluetooth devices.

¡GRACIAS POR
TU COMPRA!

NOTA IMPORTANTE:

Gracias por elegir nuestros productos. Nos esforzamos por ofrecerte la mejor experiencia de sonido y comodidad.

ANTES DE COMENZAR, TE RECOMENDAMOS:

• Colocar los audifonos dentro del estuche y cargarlos completamente durante 1.5 horas antes del primer uso.

• Leer esta guía rápida para aprovechar al máximo todas sus funciones.

Especificaciones del Producto >>

Nombre del Producto: TW7
Version de Bluetooth: 5.3
Entrada de Batería: DC 5V
Batería de los Auriculares: 30mAh
Batería del Estuche de Carga: 150mAh
Tiempo de Funcionamiento: Aprox. 2-3horas
Sensibilidad: 96+/-3
Frecuencia: 20Hz-20KHz
Impedancia: 32 Ω
Compatibilidad con Perfiles: HFP/HSP/A2DP/AVRCP

Intrucciones de Operación >>

Función Binaural :

- : Haga clic 1 vez | Reproducir/Pausar | Recibir una llamada/Finalizar la llamada
- : Mantenga pulsado durante 2 segundos | Rechazo de llamadas
- : Pulsación larga durante 2 segundos | Encender
- : Pulsación larga durante 3 segundos | Apagado
- : Haga clic 3 veces | Volver a marcar el último número
- : Haga clic 3 veces | Activar asistente de voz
- : Pulsación larga 2 segundos | Canción anterior
- : Pulsación larga de 2 segundos | Siguiente canción
- : Haga clic 2 veces | Vol+
- : Haga clic 2 veces | Vol -

Esquema del Producto >>

Estuche de Carga
Durante la carga: Luz blanca intermitente
Carga completa: Luz blanca brillante fija
Durante la carga de los auriculares: Luz blanca brillante fija
Tiempo de carga: aprox. 90 minutos
Auriculares
Durante la carga: Luz roja brillante fija
Carga Completa: Luz apagada
Tiempo de carga: aprox. 60 minutos
Advertencia

Cuando conecte el cable a un cargador de pared, le recomendamos utilizar un cargador aprobado por UL/ETL de 5 V/1 A. No utilice el cargador rápido a más de 5 V/1 A para evitar dañar el estuche de carga. Para garantizar la vida útil de la batería de los auriculares, estos y el estuche de carga deben cargarse una vez al mes.

Operación del Producto >>

Uso de ambos Auriculares/Uso Binaural :
1. Retire los auriculares del estuche de carga; se encenderán automáticamente y se emparejarán;
2. Encienda el Bluetooth de su teléfono móvil y coloque los auriculares cerca del teléfono móvil. Seleccione "Logic TW7" de la lista de dispositivos Bluetooth para conectarlos.

Apagado:

- Coloque los auriculares en el estuche de carga; se apagarán automáticamente. El estuche de carga cargará automáticamente los auriculares.
- Cuando los auriculares estén encendidos, manténgalos presionados durante 3 segundos para apagarlos.
- Si los auriculares no están conectados durante 5 minutos, se apagarán automáticamente.

Carga:

Prepare el cargador USB y conecte el cable de carga al cargador y conecte la luz blanca parpadeará después de la carga completa, una luz blanca sólida y brillante.

Preguntas Frecuentes >>

A. Cuando los auriculares no se encienden automáticamente verifique si los auriculares tienen carga (después de conectar el estuche de carga con USB, y coloque los auriculares en el estuche de carga para cargarlos continuamente durante más de 1 hora).

- B. Cuando los auriculares solo tienen sonido en un lado o el teléfono móvil no puede encontrar el dispositivo Bluetooth.
- Asegúrese de que ambos auriculares estén encendidos y se puedan encender normalmente;
 - Verifique si un auricular puede conectarse al otro dispositivo Bluetooth;
 - Borre todos los nombres de dispositivos Bluetooth correspondientes en el teléfono móvil, coloque ambos auriculares en el estuche de carga, busque un área abierta, vuelva a conectar los dos auriculares.

C. Cuando los auriculares se atascan o se desconectan mientras habla o reproduce música

- Los auriculares tienen poca carga;
- Verifique si el dispositivo está a una distancia razonable, preferiblemente a 10 metros;
- Compruebe si hay una gran barrera de señal entre el teléfono móvil y los auriculares, como una pared o una puerta de hierro;
- Hay dispositivos que interfieren conectados, como enrutadores o dispositivos Bluetooth.

FCC Statement

1 This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to

a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.396W/Kg and when worn on the body, as described in this user guide, is 0.472W/Kg(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). The maximum scaled SAR in hotspot mode is 0.498W/Kg. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on **FCC ID: O55TW73323** Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

LOGIC
makes sense

Warranty Certificate Terms and Conditions

LOGIC warrants that their Products will be free from defects in material and workmanship. The warranty period is one (1) year for the products and three (3) months for the accessories which are part of the original package including the battery. The warranty period begins the date of purchase by the End-User who shall present an invoice or a purchase receipt when requiring warranty service otherwise the warranty period will begin from the date of manufacture of the product. LOGIC will repair a product without cost to the customer if it presents a manufacturing defect or defect in workmanship during the warranty period and if the defect occurred under normal conditions of use in accordance with the instructions and specifications stated in the user's manual.

For additional information about the terms and conditions of LOGIC's Limited Warranty or to obtain warranty service information, please visit the support section at: logicmobility.com

Certificado da Garantia Términos y Condiciones

LOGIC garantiza que sus productos estarán libres de defectos de materia prima y ensamblaje. El periodo de garantía es de un (1) año para los productos y de tres (3) meses para los accesorios que forman parte del paquete original incluyendo la batería. El usuario final deberá presentar una factura o un recibo de compra cuando exija el servicio de garantía, de lo contrario el periodo de garantía comenzará a partir de la fecha de fabricación del producto. LOGIC reparará un producto, sin costo para el cliente si presenta un defecto de fabricación o un defecto de ensamblaje durante el periodo de garantía y si el defecto se produjo en condiciones normales de uso de acuerdo con las instrucciones y especificaciones indicadas en el manual del usuario.

Para más detalles de la Garantía Limitada de LOGIC y para obtener información del servicio de garantía, por favor visite la sección de soporte en nuestro sitio web: logicmobility.com.
